Katch Kan®

Window Stripper™

Problem

- Economic loss due to decreased time-efficiency

Solution

A stripper that not only strips fluid off the drill pipe and re-directs it into the flow nipple, as well as Upper Katch Kan™, but prevents tools going down annulus and allows for bi-directional fluid movement.

Value

- Easy to install - Pushed down through the rotary table once slips and bushing inserts are removed
- Mounts directly above and works in conjunction with the Surface Junk Basket™ Flexible and long lasting
- Reinforced outer edge eliminates chances of the stripper being pushed into the B.O.

Specifications

- Resistant to extreme weather environments
- Flexible and durable
