Katch Kan®

2nd Stage Low Profile Katch Kan™

Problem

- Fluid loss due to rotating heads/under-balanced drilling
- Negative environmental impact from drilling fluid discharge
- Increased operational cost to replace lost drilling fluid (especially oil based)
- Increased potential of kick turning to blowout

Solution

A load rated lower collection tray that works in conjunction with the Adjustable Containment Enclosure™ and Upper Katch Kan™ to catch fluids escaping through the work floor.

Value

- Tongue and groove design with over center latches; allowing for easy installation without tools
- Replaces dangerous, ineffective homemade steel pans that can weigh in excess of 7000 pounds and take long hours to install
- Made of lightweight, temperature and invert resistant super polymer
- Comes with two or four (depending on the size) 4-inch drain boxes and hoses that return drilling fluid to the mud tank or our Holding Tank
- Saves time and money
- Easily cleaned and maintained
- Installs in minutes without tools

Over 3000 installations worldwide.

Specifications

- Weighs 90 lbs. – 393 lbs (Depending on the size)
